BOOK No. 19

ONE DOLLAR

Foreword

Complete blueprints for any of the houses shown in this book are available from the publishers. Blueprints show four elevations, cross section, plot plan, foundation or basement plan, floor plans and cornice and interior "built-in" details. Plans show all dimensions, the sizes of all doors and windows, framing lumber sizes and all other information necessary to the construction of a home; however, due to the wide variance in the kinds of materials which could be used and in construction methods used in different sections of the country, no written specifications or quantity surveys are available. Square foot areas shown are total ground covered area exclusive of garages and porches. Plans are complete and will meet Federal Housing Administration requirements with a few variations required by local conditions, when accompanied by FHA form specifications which are obtainable from any FHA loaning institution.
